## **CLAIM AMENDMENTS:**

This listing of claims will replace all prior versions and listings of claims in the application:

Claims 1-20 (Cancelled)

- 21. (Currently amended) A method for inducing chondrogenesis, said method comprising administering an effective amount of a composition comprising <u>non-tissue</u> culture expanded CD105+ cells isolated from bone marrow and a suitable matrix carrier.
  - 22. (Cancelled)
- 23. (Currently amended) The method of claim 21 further comprising administering a bone and/or cartilage inducing factor protein selected from the <a href="Transforming Growth Factor-Beta">Transforming Growth Factor-Beta</a> (TGF-β) superfamily of proteins, wherein the protein is capable of inducing the formation of cartilage tissue.
- 24. (Currently amended) The method of claim 23 wherein said factor protein is a BMPbone morphogenetic protein (BMP).
- 25. (Previously presented) The method of claim 24 wherein the BMP is BMP-2 or BMP-9.
- 26. (Currently amended) A method for treating arthritis, said method comprising administering an effective amount of a composition comprising non-tissue culture expanded CD105+ cells isolated from bone marrow and a suitable matrix carrier.
- 27. (Currently amended) A method for treating articular cartilage defects or damage, said method comprising administering an effective amount of a composition

Application No.: 10/078,808 Attorney Docket No. 08702.0086-00000

comprising <u>non-tissue culture expanded</u> CD105+ cells isolated from bone marrow and a suitable matrix carrier.

- 28. (Currently amended) A method for repairing cartilage tissue said method comprising administering an effective amount of a composition comprising non-tissue culture expanded CD105+ cells isolated from bone marrow, a suitable matrix carrier[[;]], and a factor selected from bone and/or cartilage inducing factors protein selected from the TGF-β superfamily of proteins, wherein the protein is capable of inducing the formation of cartilage tissue.
- 29. (Currently amended) The method of claim 28 wherein said factor protein is a BMP.
  - 30. (Cancelled)
- 31. (Previously presented) The method of claim 29 wherein the BMP is BMP-2 or BMP-9.
- 32. (Currently amended) The method of claim 26, further comprising administering a bone and/or cartilage inducing factor protein selected from the TGF-β superfamily of proteins, wherein the protein is capable of inducing the formation of cartilage tissue.
- 33. (Currently amended) The method of claim 32, wherein said factor protein is a BMP.
- 34. (Previously presented) The method of claim 33, wherein the BMP is BMP-2 or BMP-9.

Application No.: 10/078,808 Attorney Docket No. 08702.0086-00000

- 35. (Currently amended) The method of claim 27, further comprising administering a bone and/or cartilage inducing factor protein selected from the TGF-β superfamily of proteins, wherein the protein is capable of inducing the formation of cartilage tissue.
- 36. (Currently amended) The method of claim 35, wherein said factor protein is a BMP.
- 37. (Previously presented) The method of claim 36, wherein the BMP is BMP-2 or BMP-9.
